

# QUARANTINE

Quarantine pertains to someone exposed to COVID-19, separating them from others.

## FOR UNVACCINATED

Quarantine for 14 days from the time of exposure and monitor your symptoms.

Quarantine period can end with a negative COVID-19 test result 7 days from the time of the exposure, so long as you remain symptom-free.

Stay masked for 14 days from the time of exposure, unless alone in your room or while eating or drinking.

## FOR VACCINATED

No quarantine is required, but continue to monitor your symptoms.

Stay masked for 14 days from the time of exposure, unless alone in your room or while eating or drinking.

A COVID-19 test is recommended 3-5 days from exposure.

# ISOLATION

Isolation pertains to someone who tests positive for COVID-19, separating them from others - even in their home.

## FOR UNVACCINATED AND VACCINATED

Individuals testing positive for COVID-19 need to isolate, regardless of vaccination status.

## ASYMPTOMATIC CASES

Isolation is observed for 10 days after a positive test.

## SYMPTOMATIC CASES

Isolation is observed 10 days from the start of symptoms followed by a 24-hour fever-free period without the use of medication and improvement of symptoms.
